  - 1. Calcaterra v. Board of Medicine-Domenico Calcaterra, M.D. The Board issued a declaratory order finding that statements of charges are public documents. Dr. Calcaterra renewed his petition for judicial review of this declaratory order. The District Court ruled in the licensee's favor. The case has been heard and submitted to the Supreme Court and we are awaiting a decision.
  - 2. Robinson v. Board of Medicine-David Robinson, M.D., entered a settlement agreement with the Board in 2016. In 2019, the Board terminated the terms of his probation. Dr. Robinson requested that the Board rescind the 2016 settlement agreement, and the Board declined to do so. Dr. Robinson has now sought judicial review of this agency action in district court. The appendix in this case was filed but Dr. Robinson alleges that the entire investigatory report should be part of the record. The Board has resisted the matter and a hearing was held on the issue on January 28, 2020. The matter has been submitted and awaiting an order.
  - 3. Yates v. Board of Medicine-Leroy L. Yates, JR, M.D., lost a contested case on December 12, 2019. Dr. Yates filed a pro se Petition for Judicial Review, which the court ruled as timely. He has since acquired local Florida counsel. The parties both briefed the issues and an oral argument was held in District Court. The Board's decision was affirmed. The parties have filed their briefs and we are awaiting routing and a decision.
  - 4. Doe v. Board of Medicine-John Doe, M.D., lost a contested case on January 16, 2020. The Petitioner had been ordered by the Board to attend a confidential comprehensive competency evaluation. Dr. Doe lost in the Court of Appeals and his application for further review has been denied.
  - 5. Lajeunesse v. Board of Medicine Michael LaJeunesse was a complainant whose case was closed by the Board and he is attempting to have the Board's decision judicially reviewed. He has attempted multiple avenues to have the matter reviewed by a District Court or higher. Most recently, his judicial review of the Board's decision declining to issue a declaratory

order was reviewed by the court and the District Court agreed with the Board's ruling. He has appealed this decision.

6. Irland v. Board of Medicine – Mark Irland, M.D. Dr. Irland was issued a confidential order and filed a Motion to Dismiss at the administrative level, which was denied. He filed a judicial review in response and the Board filed a motion to dismiss his judicial review. Oral arguments on the matter were heard on February 3, 2021. The District Court sided with the Board and dismissed the appeal. Dr. Irland filed a notice of appeal. Final briefs have been submitted and we await routing and a decision.
7. Doe v. Board of Medicine-John Doe, M.D. Dr. Doe filed an emergency temporary injunction to block the Board from filing a statement of charges. The injunction was granted. The Board moved to dismiss the judicial review and dissolve the temporary injunction. The case will be heard before the judge on October 15, 2021.

**[Complex Medical Conditions In Children: Utilizing Personalized Treatments And Addressing Health Disparities - October 26, 2021 – 1 Hour Live Webinar](#)**

Social determinants of health (SDoH), which include such factors as health care access, education level, social environment, and income, play a strong role in individuals' physical and mental well-being, influence the development of chronic disease states and impact both short- and long-term health outcomes. Children with rare and complex medical conditions (CMC) and poorer SDoH face fundamental challenges and disparities in health, including decreased access to quality health care (often leading to delayed diagnoses and treatment), inadequate access to culturally appropriate care and a lack of suitable social and support services. This activity will focus on the connection between SDoH and how they may impact access to care, treatment and health outcomes for children with rare and CMC. Learners will be provided with strategies and resources that can address these negative effects. The importance of access to personalized care that they require to live their healthiest lives will be addressed.
